Summary of her Majesty's Inspectors.

Report for the year 1871 - 72.

"The Reading in this school is very good and the order and discipline very fair. In the lower part of the school the Writing and Arithmetic require an improvement. The Infant class is fairly satisfactory, except as to Writing which appears to have been neglected".

My Lords have ordered the Grant to be reduced by one-tenth under article 32 (b) as H.M. Inspector reports that the Writing of the Infants is unsatisfactory. He recommends that a separate department should be formed for them. My Lords hope that this suggestion will receive the attentive consideration of the Managers.

My Lords are glad to learn from your letter of the 22nd of April that in future all the Church Furniture will be removed from the School room on week days.

Summary of Report for the year ending January 31st 1873.

"This school is fairly satisfactory. The part in which improvement is most need is the Arithmetic of the Upper standards. The very large class of Infants should have the whole of the room of which they now have only part and there should be a good female teacher".

My Lords regret to learn from H. M. Inspector that an efficient teacher has not been provided for the large class of Infants in your school and I am to state that unless a suitable arrangement be made for their instruction during the next six months the grant on their account will possibly be withheld next year.

Adverting to your letter of the 18th ultimo I am to inform you that the services of a qualified Assistant teacher should be secured; the arrangement of a female pupil teacher would not meet with their Lordships approval unless she has reached the fourth year of her apprenticeship.

Got a new time table signed on the evening of the 23rd by Mr Wylie.

Summary of the HM Inspectors Report:

"The order in this school is fairly well maintained but the results of the examination are again far from satisfactory. The work of the 3rd, 4th and 5th standards being especially low. In the standards, Arithmetic is badly done and Writing and Spelling are very faulty. In the second standard the Writing is generally good and papers are neatly worked Arithmetic and Reading being fairly good. A large number of Infants attend who are entirely under the management of an Assistant in the class room. They are pretty well taught except in Reading which is a backward subject - some desks should be provided for the classroom. The rain comes in through the roof of the principle school room and the cupboards in the wall are damp"

My Lords have ordered a deduction of one tenth from the Grant for faults of instruction especially in Arithmetic (Article 32 (b)).

W. S. Greenwood is now qualified under Article 79, but not under Article 60.

F. Kellett - Grammar.

Rev. J. Clarke called with the Report.

Summary of the HMI report for the year ending January 31st 1877.

"The order and management of this school is pretty fair though there is a want of energy and life in the teaching staff. The instruction has by no means improved since last year when, to judge from the report, it was far from satisfactory. Reading is bad generally, least so in the third standard. The Writing of the first and second is fair, but Spelling is defective. In the Upper standards Spelling is very fair, Writing moderate. Arithmetic is very inaccurate in all the standards, least so in the third. Class work very poor. The school accommodation is not sufficient for the numbers in average attendance. The supply of books is insufficient especially in the second standard. The school requires considerable care and attention".

My Lords regret that it is necessary to make a deduction of one tenth from the grant on account of defective instruction (Article 32 (b1)). Great improvement will be expected next year.

The average attendance has exceeded 137, the maximum for which there is accommodation (Article 17 (c)). Should this be allowed again the entire grant may be forfeited.

A. Dean has passed fairly under Article 19 (e).

8 Apr

Mr Rowe came again this morning and severely reprimanded several boys for misbehaviour on Friday night.

12 Apr 1878

Mr Clarke called this morning bringing the Report on last examination which was as follows:-

Summary of HM Inspectors Report

"The second standard have passed a fairly satisfactory examination in the Elementary Subjects and there is some improvement in the work done by the rest of the school. Further improvement is, however, still much needed. The subjects of class examination were poorly done. The discipline is unsatisfactory, as is shown by the want of good order in school and by the use or rather abuse, of

the offices (especially the boys), and the playground. The offices should be better lighted. the boys urinal is out of order and there should be one conveniently placed for the Infant boys. Maps of Yorkshire, Asia and the World are wanted. The report of a visit without notice should have been entered in the Log book. Several items in the accounts were only paid after the close of the school year."

I am directed to inform the Managers finally that if the limit prescribed by Article 17 (e) to the average attendances in the Mixed school i.e. 137.5 is exceeded to however small extent, the whole grant will be forfeited.

The terms of HM Inspectors report do not admit of any grant under Article 19 (a) being allowed to this department.

My Lords hope that HM Inspector will not again have to call attention to irregularities such as were reported to you in the official letter of the 5th October last. The omission to enter the report in question in the Log book should be supplied without delay (Art. 39)3.

J. Holmes, J. Jagger, E. Clough, J. Hillam and A. Sugden have been struck of the Schedules of this school, as it appears that they belong to Bradford Chapel Green Board School, where having made the requisite number of attendance, they were presented under Article 19 (b)2 at the inspection on the 22nd February.

A. Dean should be informed that he is now qualified under Article 79, but not under Article 60.

C. W. Kay has passed fairly.

F. Kellet - Arithmetic, Geography, School Keeping.

Signed: John Clarke, Coy. Sec.

14 Mar 1880

Mr Clarke and Mr Rowe called this morning bringing the Report on last examination which is as follows.

#### Summary of HMI's Report

"The school is now organised as one department. The instruction of the Infants appears to have suffered much from the change, their attainments are very poor indeed. The work of the elder children has in some respects improved under the new Master, but it is not yet satisfactory and there is a great want of intelligence. Only one set of books has been in use in each standard. A map of Yorkshire is wanted. The desks were not sufficiently supplied inkwells. This is a defect affording facilities and temptation to copy which the Managers should attend to. The Sewing mistress should have been informed of the requirements of the third schedule and the contents of the circular on Needlework. The boys urinal was stopped up with dirt and the junctions of the slabs need re-cementing and their offices were dirty. The report of a visit without notice paid in 1877 and alluded to in the report of the year before last does not appear to have been yet entered into the log book". My Lords have upon this occasion allowed payment for scholars presented under Article 20 (a) 1 in standards below that prescribed by the bye laws for partial exemption from school attendance. Henceforth, however payments under this Article will be made in accordance with the enclosed Memorandum.

Their Lordships are compelled to deduct one tenth from the Grant on H.M. Inspectors Report (Article 32 (b)).

The Infant instruction must improve greatly or the payment under Article 19 (13) (a) will be withheld.

The defects mentioned by H.M. Inspector should be carefully attended to (Article 32 (b)).

C. W. Kaye has passed fairly.

F. Kellett - Grammar, Arithmetic - Geography.

The Pupil Teachers memorandum of Agreement should be produced the day of the H.M. Inspectors visit.

Signed: John Clarke, Coy. Sec.

Resigned charge of this school.

*Signed: Thomas Thealler.*

Visited the school this morning and found in good working order.

*Signed: John Clarke, Cor. Sec.*

3 Oct 1881 and 7 Oct 1881

Took temporary charge of this school. My predecessor was right in saying that the school was in poor state and wofully backward. How I am to work it up for examination in 3 months I dont know. Geography and Grammar are in a very backward state.

*Signed: John Henry Parker*

14 Oct 1881

Today is very stormy and wet. Several children are absent no doubt on account of the weather.

In several places the rain drops through the roof, the wind has blown a pane of glass in the Infant room out making the room very uncomfortable for both scholars and teacher.

Work progresses slowly.

21 Oct 1881

Examined Standard 1 in the three R's. Reading is very poor. 35 were present and 8 only would pass in it. The reading was not so good as that of a good poor class in an infant room.

Writing and Arithmetic were poor though a little better than the reading.

28 Oct 1881

Again Examined Standard 1. There is very little improvement.

Cautioned the monitors to look strictly to their classes especially in reading.

Whilst I was examining Standard 2 the P.T. had Standard 3 in the class room.

James McEvoy seems to have been disorderly and to have been stuck by the P.T.

At Play time the boys mother came up in a great rage and struck Albert Peel. Her passion was quite master of her and if I had to lay hands upon her to get her to the school door. As the boy had misbehaved before and had taken 3 or 4 inkpots out of the school and broken them I dismissed him and returned his school pence.

4 Nov 1881

James McEvoy was waiting outside the school gate tonight to fight the Pupil teacher when he left school. The P.T. went down the road with me to avoid him.

Examined Standard 1. The reading is still very poor. The reading books are in a bad state many of the leaves are torn out.

Speaking of Reading Books reminds me that the Books throughout the school are in a shocking state. Some leaves are torn, others are torn out altogether and the backs of some contain indecent writing.

11 Nov 1881

The Rev J. Clarke visited the school on Monday morning and left a form to be filled up with the approximate number of children for examination. It was filled up and returned to him in the evening. School was began in the afternoon at 1.30 p.m. instead of 2 p.m. and will so continue for the winter.

18 Nov 1881

The Closets were cleaned out on Saturday and were so till Monday, but on Tuesday morning they were not fit to be seen. I am convinced that others use them beside the children.

Standard 1 improves very slowly.

The other Standards are so backward that I cannot take them more than once a week.

There are 32 half timers in the school which should be worked as a half time school.

25 Nov 1881

I had to attend the funeral of a relative in Leeds on Wednesday morning and so the school had holiday.

Some one stole the keys of the school door on Tuesday. Nothing can be left in the porches.

Instead of examining Standard 1 I gave them a reading lesson for an hour. They are very backward.

Gave the P.T. paper and poems for his examination on Saturday at the Parish Church School, Bradford.

2 Dec 1881

Several Boys and Girls in the upper Standards have left school to work full time, other children have been admitted.

Most of the uppers Standards are half time and I find great difficulty in teaching them Geography and Grammar. The same lesson has to be given twice over.

Gave a reading lesson to Standard 1 again.

9 Dec 1881

The Assistant Mistress has been absent the last 3 days on account of illness.

One of the monitors took the Infants.

The Rev J. Clarke visited the school on Wednesday.

The work has gone on as usual.

16 Dec 1881

One of the monitors was absent on Wednesday and Thursday owing to the illness of her mother.

The Rev J. Clarke called on Thursday.

Took Standard 1 in reading again, they improve very slowly their writing was rather better done so was the arithmetic.

Standard 2 did their work very well.

It has been very cold in school during the week.

19 Dec 1881

Monday at 12.45 Hiram Holder threw an old can at the school window and broke it.

22 Dec 1881

What to do with Standard 1 I am at a loss to know. The Reading is not equal to that of a good first class in an Infant room. The arithmetic also is very poor.

The monitors seem to detest a reading lesson and the time table does not provide for sufficient Reading.

The attendance during the week has been gradually decreasing.

Broke up today for a week.

26 Dec 1881 - 30 Dec 1881

Week Holiday - Xmas

6 Jan 1882

The school re-opened on Monday Jan 2nd.

The attendance was moderate as the mill in the neighbourhood were playing for the day. I gave holiday in the afternoon.

Several children have been absent during the week and those at school don't settle to work knowing that the other school have another week holiday.

13 Jan 1882

The Rev J. Clarke visited the school on Tuesday and brought with him Miss Infleson the newly appointed Mistress whom he introduced. She is taking Standard 1 for which I am very glad for they are very backward in fact some of the children have been in the Standard for 3 years and I don't expect they will pass at the upcoming examination.

20 Jan 1882

Mr Clarke visited the school this morning.

Spent the week in preparing the children for examination.

The work varies very much. Some do their work very fairly and others very poorly.

The arithmetic is weak in Standard 4. One or two do their sums correctly at once, the others vary in their work.

16 Mar 1883

Rev. J. Clark visited the school today and brought the Report for 1882.

Summary of H. M. Report:

"There is, I am glad to report, a considerable improvement in the condition of the school. Writing has been carefully taught and is generally good and the papers neat. The rest of the work is, on the whole, fair in the first, second and third Standards but still defective in the fourth, fifth and sixth Standards. More improvement in these Standards may be looked for next year. The Infants are in a fair stable proficiency on the whole. Reading and Writing being better done than Elementary Arithmetic. It is not satisfactory that the first Standard had only one Reading book.

The Scholars numbered 76 and 77 on the Examination Schedule, having been returned last year as over six were disqualified by age for further presentation under Article 19 (b) 1.

E. Thornton - Failure"

13 Feb 1885

Eliza Thompson and James left because I would insist on their bringing their school pence.

Received the Report for 1884.

Summary of H. M.I's Report:

"The school has passed a fair Examination in the three Elementary Subjects. The number of scholars has been increasing without a corresponding increase in the Staff.

The Mistress has made a praiseworthy effort to cope with the difficulties under which she has been labouring. The reading was fairly good in the fifth and sixth Standards and fairly good also in the first Standard, it was only fair in the others, being wanting in intelligence.

The Handwriting was fair on the whole.

The Spelling was fair except the fourth Standard.

Arithmetic was bad in the first and fifth Standard and weak in the fourth and sixth Standards; it was very fair in the second and third Standards.

Mental Arithmetic was bad. Thus this subject was on the whole much below fair. Under article 109 (f).

The Recitation was very fair generally and good in the upper Standards but the Grammar was very poor.

The School is in good order and there is promise that with an adequate Staff really good results may be obtained another year.

The Infants appear to have been well taught and managed until the recent change in their Teacher since which the instruction and management have fallen off".

Summary of H. M.I. Report for 1885:

Mixed School: "This school is in a crowded state and the staff which was inadequate last year for so difficult a school has been further weakened by the removal of the Assistant Mistress to the Infants School. The Elementary work is fairly satisfactory but the general state of the school barely allows it to be classed for a Merit Grant.

Reading is fairly fluent but it is inaccurate, stumbling and mechanical.

Writing and spelling are poor in standards higher than the third.

All classes are weak in Mental Arithmetic but while the fifth and sixth standards are very backward in their summing. The work done in the second, third and fourth Standards was fairly satisfactory.

Under the circumstances it was a great mistake to attempt a Class subject.

Only in the fifth standard was there any knowledge of Grammar and the boys who are quite ignorant of Geography were presented in a Second class subject. apparently in order that the Girls might take Needlework as a class subject.

The Mistress has worked very hard and Discipline is well maintained under very difficult conditions. Her efforts would have been attended by very different results had it been better supervised by the manages, in regarding teaching Staff".

Infant Class: "The Infants are in a very backward state in regard to Elementary Subjects. The Scholars over seven years of age have been badly taught. The first class children know the words of their ? but are unable to phrase their Reading. Their Writing is very irregular. The younger children have been quite neglected".

" Very few Object Lessons have been given and very little has been learned from them.

The Repetition was fairly satisfactory.

No Merit Grant can be recommended and a reduction of Grant is recommended under Article 115 for faults of Instruction, especially in the case of children over seven years of age".

A deduction of one tenth is made from the Grant to the Infants School for the reasons specified in the H. M. I's Report.

A. Wilkinson has passed fairly

E. Thornton Needlework

29 Apr 1887

Rev. J. Clarke visited this morning.

Bowling Chapel Green C. E. School

Mixed School: "The school is in a very unsatisfactory condition. The principal reason is that the staff is not sufficiently strong to manage the large number of scholars now in attendance. It is apparent that the boys do not exert themselves and it is very desirable to keep this school as a Girls School as it used to be.

Reading was full of mistakes, the fourth Standard doing exceptionally badly.

Handwriting is badly taught, the details of the lesson do not receive attention.

Spelling was bad throughout.

Arithmetic was satisfactory in the first three Standards only.

The Class Subjects were unsatisfactory good to earn any grant".

Infant Class: "The Infants are very backward. The Mistress has been ill, but I do not think justice has been done to the children who are poorly prepared for the first Standard.

This is the second year that the Instruction to the Infants has been neglected.

"Better results will be expected in the Upper Part of the School next year or Article 115 (i) will be enforced. A deduction of one tenth has been made from the Grant to the Infants Class in consequence of the unsatisfactory Report of H. M. I".

Received the Report from Rev. J. Clarke today.

Report of H. M. Inspector

Mixed School: "The elementary work of this school, though an improvement on that of last year, is still only fair, and the general state of the school is far from being satisfactory. In the lower standards the Reading is marked by carelessness and inaccurately; and though there is some attempt at style in the first class the scholars fail as a rule to gather information from what they read and the oral answering displays great ignorance.

Writing is only moderate but spellings fair, except in the fourth Standard, where it is bad.

Mental Arithmetic seems wholly neglected but the written work was fairly satisfactory.

Only in the second Standard have the Grammar lessons been of use and the garments as well as the Needlework done on the day of Inspection forbid the recommendation of a Grant under Article 109 (c).

The Mistress works hard but she has had a very weak staff and it is greatly to be regretted that boys above the first Standard are allowed to attend".

Infant Class: "The Infants have passed a much better examination than last year in the elementary Subjects.

In Reading and Number they are bright and intelligent but the Writing and Spelling of the first class must be improved".

"The Object Lessons have only partially served their purpose and varied Employments are not attempted. The Needlework is only moderate and the Note Singing is not deserving of the Double Grant".

"E. Thornton Geography, Needlework and History.

She should be informed that she is now qualified under Article 50 but not under Article 52."

"The Managers should consider whether in view of the state of A. Wilkinson's health it is desirable that she should resume the occupation of Teaching".

"M. Sutcliffe Failure"

"M. Robinson has been excused her examination on account of illness. She will be expected to take the second year papers next year".

"Miss Ingleson will receive her Certificate in due course".

Copy of the H. M. Inspectors Report 1888 - 1889

Mixed School: "This school has passed an examination which is hardly fair.

The Reading of the first standard was very weak, there being much uncertainty; that of the other standards was fair. There was no intelligent appreciation of the passages read in any standard above the first.

The Writing was on the whole below fair, that of the third standard was infirm in character and the junctions were very weak also.

The Arithmetic of the second standard was very good, that of the third standard fairly good and the other standards fell below fair. In the upper standards more care should be taken to secure accuracy and methodical arrangement.

The English of the upper standards is too weak to allow of any grant being recommended.

The tests in Music were not well done.

Needlework was barely fair".

Infants Class: "The first class has passed very fairly in Reading and Number, and the Writing and Spelling are fair. The second class is very weak in both Reading and Number and the Writing is below fair.

The Recitation needs more careful articulation.

The Object lessons do not sufficiently fulfil their purpose; complete answers were seldom given and more attention should be paid to cultivating habits of observation.  
Expenditure on account of Interest on overdrawn balance is not recognised by the Department under Article 99".

"M. Robinson has passed fairly and should attend to Geography\*, History\* and Grammar".  
"Annie Wilkinson - Writing\*, Spelling, Arithmetic\*, Geography\*, History\*, Needlework\* and knowledge of Methods. She should be informed that she is not qualified by the Examinations under Article 50 and 52.  
She can be qualified for Article 50 only by passing the Examination specified under Article 46".

"A Pupil Teacher must not be allowed to serve in school more than 25 hours a week, as specified in Paragraph 1 of the Memorandum Agreement".

"E. Thornton is recognised in the school under Article 50".

4 Jun 1890

Report of H. M. Inspector.

Mixed School: "The condition of this school demands the serious attention of the Managers, the work being generally of an unsatisfactory character.

Reading is careless and inaccurate in the lower Standards and although of better style in the higher classes it is everywhere without intelligence.

Writing is very fairly done in the first Standard but in all standards it is careless and badly formed

Composition is very poor in the fifth Standard and Spelling is inaccurate in the fourth and fifth Standards.

Arithmetic is very fair in the first and third Standards, it is fairly done in the other standards, except in the sixth where it is very moderate.

A grant for English cannot be recommended, the Recitation being moderate and the teaching of Grammar worthless.

Discipline should be firmer".

Infants Class: "The Infants are taught in a room much too small for their accommodation. Their elementary work is fairly done and Object Lessons have been given, although with the indifferent

success. As the infants have been unhealthily crowded into a room which is not large enough for the numbers in attendance, I cannot recommend the payment of any merit grant and if I find that the overcrowding continues I shall recommend a serious deduction of the grant next year".

"M. Robinson has passed an unsatisfactory examination. Should she be required to complete the staff and fail to the same extent next year the grant will have to be reduced under Article 115 (ii)".

*Signed: F. Crowther and John Clarke, Vicar*

4 May 1891

Report of H. M. Inspectors.

Mixed School: "The elementary work is still in an unsatisfactory condition.

Reading is slow and inaccurate in the first standard, low and indistinct in the second and third standard and although fairly good style in the fourth standard, there is a great want of intelligence in all standard.

Writing is (excepting in the first standard) wanting in firmness, it is cramped with letters carelessly joined.

Spelling and Arithmetic of the upper standards are poor. Arithmetic is the best subject being fairly good in the second and third Standards. It is however moderate in the fifth and sixth standards.

The Grammar of the upper Standards is exceedingly poor but the lower grant is recommended on account of the very fair knowledge shown by the lower Standards.

As the present Teacher has improved the discipline there is reason to hope that she will improve the instruction, if an adequate staff of Assistants is provided".

Infant Class: "The elementary work is very fairly done.

Writing being the best feature.

Drill, Singing and Recitation have been introduced with very fair results, but as yet there are no various occupations. The work generally would benefit from the enforcement of more exact discipline".

"With reference to M. Robinson the Managers attention is requested to the enclosed circular. She should be informed that if she passes the Queens Scholarship examination she will be recognised under Article 52. In consequence of her not having been specially recommended by H. M. Inspectors on the ground of practical skill. If she is to be retained in this school, my Lords should be informed whether it is desired that she shall be recognised as a Pupil Teacher or provisionally as an Assistant Teacher".

"M. E. Skirrow must arrange with H.M. Inspector to obtain from him the report upon Reading and Recitation which is required by the Syllabus for 1891, before she can be admitted to the examination for a Certificate".

Report of the H. M. Inspectors

Mixed School: "The condition of the School is not satisfactory. The defects which have been previously pointed out still exist.

Reading is fairly accurate but is marked by great want of intelligence.

Writing is fairly done in the lower standard but it is often careless and ill formed in the higher classes.

Composition and Spelling are moderate in the fifth Standard.

Arithmetic is fairly done in the second, third and fourth standards but in other standards it is unusually inaccurate.

The teaching of Grammar has been so unintelligent that no grant can be recommended for this Subject.

I am obliged to report this school as unefficient under Article 86. The upper standards viz the fourth, fifth and sixth are receiving very inadequate instruction. The reason is because the staff is insufficient. On the occasion of a visit without notice it appeared that there were two hundred and thirty two children on the books and only two adult teachers beside the Head Mistress to teach them. There was an unusually small pupil teacher helping as far as she could. It is not reasonable that grants should be paid to a school which fails to provide sound instruction for the children attending it".

Infant Class: "This large class is taken by one Teacher without assistance and considerable credit is due to her for the pains which She has taken in her work but on the occasion of a visit without notice the lowest weekly average for the quarter had been fifty six and for the previous three weeks it had been sixty three, sixty seven and sixty eight. There being only one teacher for this number the youngest children were doing next to nothing. It is impossible for one teacher to do justice to sixty eight children divided into three classes".

E. A. Firth      Grammar, Composition \*, Geography \*, and History\*.

"She has failed to pass her examination. With reference to future Examinations the Managers attention is requested to Article 41 (b).

"M. E. Skirrow must arrange with the H. M. Inspectors to obtain from him the Report upon Repetition which is required by the Syllabus for 1892 before she can be admitted to the examination for a Certificate".

"My Lords hereby warn the Managers that H. M. Inspector report the Mixed School inefficient on grounds of defective instruction in elementary subjects and that should not great improvement be made by next year a formal warning may be incurred under Article 86".

29 Apr 1893  
Report of H.M. I.

Mixed School: "The school as a whole has passed an unsatisfactory examination because although the younger children, those namely in the first, second and third Standard are very fairly taught, the sixty children in the fourth, fifth and sixth standards were very backward. The staff is unsatisfactory. There are 136 children on the Schedules and the Mistress has the aid of two Teachers qualified only under Article 68 of the Code. The instruction of so large a number of children in one room is a difficult task. It should be observed that this unsatisfactory School is unsupported either by private subscription or aid from societies or collections in church. I report the school inefficient on the ground that the staff fails to do justice to the older scholars. Money should be subscribed to render the school efficient"

Infant Class: "The Mistress takes great pains and produces very creditable results considering the difficulties under which she is working. There is only desk accommodation for about half the children in average attendance".

"My Lords caution the Managers that should the instruction in the Mixed School not improve a formal warning will next year be incurred (Article of the Code).

"F. Aspinall and A. A. Cowles are continued under Article 68".

16 Apr 1894

Received H. M. Inspectors report this morning:

Mixed School: "This school has improved under the new mistress and the elementary work is now very fair on the whole although as yet the intelligence of the children has not developed very much. Reading is weakest in the First Standard but in every class attention should be paid to teaching the children to grasp the meaning of what is read.

Handwriting is less satisfactory than the other elementary subjects and Composition is only fair; but Spelling is good in the Third Standard and fairly good in the Fourth Standard.

Written Arithmetic has been successfully taught in the first, second, third and fourth Standards and a fair start has been made with Singing by note.

The style of the Recitation is very fair; but in the first Standard there is great want of intelligent knowledge of the pieces learnt.

Grammar has been satisfactorily taught in the third Standard and there is a fair knowledge of the subject in the second Standard; but the work is so worthless in the other classes that no grant can be recommended for this subject.

To bring this school into a really satisfactory condition it is necessary that the staff should be strengthened".

Infant Class

"This class has been generally well managed and its condition is now satisfactory. The elementary subjects have been well taught with the exception to the Reading, which lacks fluency.

Object Lessons have been useful and varied Occupations interesting"

"H.M. Inspectors reports the Mixed School inefficient on the ground that a class subject has not been satisfactorily taught. I am therefore directed to give the Managers formal warning under Article 86 of the Code that the grant to that Department may be withheld under that article at the next annual inspection if he again reports it to be inefficient".

"E. E. Tattersall is recognised under Article 68 and F. Aspinall is continued under that Article A. E. Firth - Grammar, Geography and History".

*Signed: M. E. Dixon, C. Mistress and F. Crowther, Manager.*

Summary of H. M. Inspectors Report for 1895

"This school has much improved both in discipline and attainments, much of the elementary being of very creditable character.

Reading is generally very satisfactory and the children show more intelligence than they have done in previous years.

Handwriting is very fairly done and Spelling is good except in the second and fourth Standards.

Written Arithmetic is fair in the fourth Standard, very weak in the second Standard but fairly good in the first, third and fifth standards.

The composition exercises were nicely written.

Music and Singing have much improved.

The general improvement is especially observable in the character of the class work which is now on the whole satisfactory. The children show much more intelligence than in recent years and the head teacher deserves praise for hard work".

Infants Class: "This is a generally well managed class but a little more attention to the very youngest children is desirable".

E. A. Firth      Grammar \*, Geography \*, History \* and Music.

F. Aspinall and E. E. Tattersall are continued under Article 68 of the code.

#### Copy of Inspectors Report

Mixed School: "All the work has been carried on in one poor room and this tells seriously against good organisation and discipline. The teachers work hard and produce upon the whole fairly good results. The class subjects demand more intelligent handling.

Geography this year cannot be classed as good. The order of the boys in the higher standards leaves much to be desired and it is only by taking into consideration the difficulties alluded to above that the higher Grant for discipline can be recommended.

A classroom is sadly needed".

Infants Class: "The infants have been taught with very fair success. The room which they use gives little space for marching and drill. It would be well if the managers could build a new infants room and make the present one a classroom for the mixed department".

"A class room for the elder children is essential if the school is to be really efficient and my Lords trust that the Managers will see their way to providing it in the course of this year.  
Special Attention is required to the enclosed Form 69".

L. Wilkinson is recognised under Article 33 and E. E. Tattersall and L. Rushworth are continued under Article 68.

Copy of Report from Ripon Diocesan Educational Society.  
"The Managers are to be congratulated on the possession of the new Infants Room and the clearing off of the Building of £140.  
The Buildings now are in excellent condition, the only want being a Babie's room.  
The Mixed School has been coloured and thoroughly cleaned. I was struck by the improved appearance, it is now a handsome room.

The lighting of the Classrooms might be improved by the insertion of glass panels in the wooden partition.

Discipline and tone are noticeably good and on the whole the school is quite satisfactory.

Signed by Wilfred Lees".
